

**To Persons on mailing list who provided written comments at time of June 20, 2017 PIC.**

September 13, 2017

Dear \_\_\_\_:

**Re: Colgan Wastewater Class Environmental Assessment: Summary of Comments and Responses and Invitation to Information Forum**

As you are aware, in January 2016, the Township of Adjala-Tosorontio completed the Colgan Master Servicing Plan Amendment, which identified a preferred wastewater servicing solution for approved growth areas in the Community of Colgan. The Master Servicing Plan satisfied Phases 1 and 2 of the Municipal Class Environmental Assessment (Class EA) process for the new wastewater system, which is subject to Schedule C of the Municipal Class EA.

Phases 3 and 4 of the Class EA process are now underway to identify the preferred locations and design concepts for the wastewater treatment plant (WWTP) and outfall to service the growth areas.

On June 20, 2017, a Public Information Centre was held to share information about the project with the public, to discuss the project with them, and to listen to their comments, questions and concerns. Written comments on the project were received from Township residents.

We appreciate that you took the time to provide written comments. A summary of the comments and responses (see attached) was prepared by the Project Team in order to address most of the comments we received, and to share them with those that have provided questions or comments.

In order for us to hear any additional comments or provide further clarification about the project, we invite those who provided written comments to join the Study Team for an Information Forum.

The Information Forum will be held:

- Wednesday, September 27, 2017
- 6:00 pm to 8:30 pm
- Township offices, 7855 Sideroad 30 Adjala, Alliston

The Information Forum will include brief presentations by the Project Team on the topics discussed in the attached comments and responses summary. The presentations will be followed by facilitated discussions to help provide any further clarifications and to obtain additional feedback from participants.

To ensure that we have sufficient seating, you must confirm your attendance by e-mail to [arun.jain@exp.com](mailto:arun.jain@exp.com) by September 22, 2017. Light refreshments will be served.

Yours truly,

**Mr. Arun P. Jain, P.Eng., M.Eng.**
