^{4A}Inorganic Parameters (Schedule 23) are required to be tested every 60 months for a small municipal residential system or non-municipal year-round residential system (O. Reg 170/03 Schedule 13-2.(3)). The last set of samples was collected and tested in 2021, the next set of samples is scheduled to be collected and tested in 2026.

^{4B}Fluoride is reportable every 60 months. The most recent Fluoride samples were tested in 2022, the next set of samples is scheduled to be tested in 2027.

^{4C}Sodium is reportable every 60 months. The most recent Sodium samples were tested in 2023, the next set of regulatory samples are scheduled to be tested in 2027.

^{5A}This system follows a reduced sampling schedule (O.Reg 170/03, Section 15.1.5). The number of sampling points for the system is based on the population served by the system. The number of people served by the system is 237 persons (as confirmed with the Owner on November 9, 2022) and therefore requires one distribution sampling points per sampling period.

^{5B}Plumbing samples are not applicable as this system qualifies for the plumbing exemption per O. Reg 170/03 Schedule 15.1-5 (9) (10).
